Forecast for Monday 23 Oct 2023

Weather: A few mist and fog patches forming during the second half of the night, these starting to lift into low cloud as the wind picks up. Variable amounts of cloud around initially, but lengthy sunny spells developing from late morning. Skies turning cloudy from late afternoon with an increasing chance of rain overnight.

Chance of cloud-free hill tops above 600m: 40% rising to 70% from mid morning.

Low cloud and visibility: Visibilities generally good but locally poor to moderate thou to mid-morning due to mist and fog patches. Areas of cloud above 500m mostly on east facing slopes and across the Black Mountains will give some temporarily poor visibilities over the summits into the afternoon.

Meteorologist's View

An increasingly fine day, albeit still very wet under foot due to recent wet weather. Poor visibilities on some slopes will make navigation challenging at times.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 21 Oct 2023	7.2mm	23.2mm	37.4mm

Forecast for Tuesday 24 Oct 2023

Weather: Generally cloudy with outbreaks of rain, locally heavy pushing north and east across the park early Tuesday morning. Risk of thunder for a time but conditions improve during the morning with sunny spells developing. A few isolated showers possible during the afternoon.

Maximum wind: Easterly 5-10 mph gusting 20-25 mph

Chance of cloud-free hill tops above 600m: 30% rising to 70% from late morning.

Low cloud and visibility: Areas of cloud with bases between 500-600m moving north across the park during the morning lead to poor to moderate visibilities across some summits. Conditions will improve from late-morning as cloud lifts and clears. A few showers during the afternoon making the view of nearby hills appear rather hazy.

Temperature: **Valleys:** Plus 8 Celsius becoming plus 14 Celsius.
At 600m: Plus 6 becoming plus 9 Celsius.
Freezing level: Above the summits.
